SimWorks to help operators ensure the security of content and applications on  
**Symbian OS** smartphones

### **SimWorks Joins Symbian Platinum Program**

***London, United Kingdom - 25 November 2005*** – SimWorks today announced that it has joined the Symbian Platinum Program to support the growing market for smartphones based on Symbian OS™. As a Platinum Partner, SimWorks is committed to assisting carriers in securing content and applications on Symbian OS devices with its range of leading Symbian OS security applications such as its well known Symbian OS backup and anti-virus applications. Symbian develops and licenses Symbian OS, the operating system that powers today's most popular smartphones. Symbian OS is licensed by the world's leading mobile phone manufacturers and to date, over 47 million phones based on Symbian OS have shipped worldwide.

Symbian OS phones are growing in popularity worldwide. As of Q3 2005 year-on-year phone shipments grew more than 131% compared to the same quarter last year. According to technology analyst firm Canalys, overall global shipments of smart phones were up 75% year-on-year in Q3 2005 with Symbian emerging as the market leader.

Aaron Davidson, SimWorks CEO said "As Symbian OS phones are increasingly deployed into the mass market, SimWorks will continue to work with Symbian and the Symbian OS ecosystem to ensure that Symbian OS remains the most secure operating system for smartphones."

"This partnership reflects SimWorks dedication to providing industry leading mobile security solutions such as SimWorks mobile phone backup and anti-virus applications. By becoming a Symbian Platinum Partner, we can continue to rapidly expand our mobile security solutions and strengthen our relationships with users, Smartphone manufacturers and network operators" added Davidson.

"Mobile phones are an essential part of our everyday lives with users increasingly relying on them to store important personal information such as contacts and photos. SimWorks' established range of leading mobile security products for Symbian OS further safeguards this information against viruses and other malware." said Alan Roderick, Head of Partner Marketing, Symbian Ltd. "The addition of SimWorks to the Symbian Platinum Program underscores our joint commitment to bring mobile security technology to the ever expanding and increasingly sophisticated Symbian OS ecosystem."

## **Notes to Editors**

### **About SimWorks International Limited**

SimWorks is a leading developer of mobile security product for network operators. SimWorks' product portfolio currently includes SimWorks Anti-Virus and Subscriber Data Management System (a phone synchronisation and social networking application).

SimWorks Anti-Virus is presently one of the best recognised anti-virus applications for Symbian UIQ and Series 60 based mobile phones. SimWorks was the first vendor to release an anti-virus product for UIQ phones and remains one of the few vendors to support both the UIQ and Series 60 platform.

Further information on SimWorks Anti-Virus, phone backup, social networking and directory service applications is available at [www.simworks.biz](http://www.simworks.biz).

### **About the Symbian Platinum Program**

The Symbian Platinum Program includes companies that have a technology or strategic position that is key to the success of mobile computing technology surrounding Symbian OS. As part of the program, Platinum Partners benefit from a range of commercial services, including technical support and joint marketing opportunities as well as privileged access to Symbian OS source code and a dedicated Partner Support team. For more information please see [www.symbian.com/partners/platinum.html](http://www.symbian.com/partners/platinum.html)

## **About Symbian**

Symbian is a software licensing company that develops and licenses Symbian OS, the global open industry standard operating system for advanced, data-enabled mobile phones.

Symbian licenses Symbian OS to the world's leading handset manufacturers and has built close co-operative business relationships with leading companies across the mobile industry. In the first half of 2005, more than 14.5 million Symbian OS-based mobile phones were sold worldwide to over 200 network operators, taking the installed base of Symbian OS phones to more than 47 million.

Symbian has its headquarters in London, United Kingdom with offices in the United States, Europe (Cambridge, UK and Ronneby, Sweden (UIQ Technology AB), Israel and Asia (Bangalore, Beijing, Seoul and Tokyo).
