### Where can you get W3 MAG???

Check out the book stands in Whitcoulls, Paper Plus and any leading book store, or head on over to our [subscription page](#) and [subscribe online](#), the current issue will be in your letterbox in just a few days!

### WORLD EXCLUSIVE SIMWORKS

fonetango is the easy way to back up your phone. fonetango works over the air and keeps all your phone/SIM contacts safe so if you ever lose/replace your phone you can have all your old numbers put on your new phone. Groovey!

fonetango also lets you check out, add, delete and change your contacts on the web and when you're done it'll all be automatically copied back to your phone. Sorted - no more little screens, tiny keys and confusing menus!

The best thing about fonetango though is how it helps you get in touch and stay in touch with friends, family, anyone! If you've ever wondered how popular you really are then fonetango can tell you. If you've ever wondered who out there in the wide world has your number fonetango can tell you that too (of course fonetango lets you "hide" the fact that you've got a particular number in your address book in case you really don't want that person to know that you have it!).

fonetango will let you do some other really handy things as well, like giving your number to people you know that don't already have it and giving you the number for people who know you where you don't already have it.

To find out more just head over to [www.fonetango.co.nz](http://www.fonetango.co.nz). It's time to tango, fonetango style!
